

Sediment Sluicing System HSR

Cost-effective and high efficient, reliable components for your desander plant

System patented Nr. 696 137

- **Fluid dynamic switch without any wear**
- **Minimal loss of flushing water to evacuate sediments**
- **Continuous operation during flushing**

Highly reduced costs

- Investment costs
- Operation costs
- Maintenance costs

New installations and rehabilitations

Significant higher reliability and availability, minimal maintenance

Safety

Significantly reduced surge waves

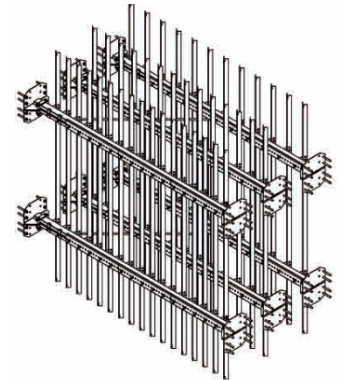

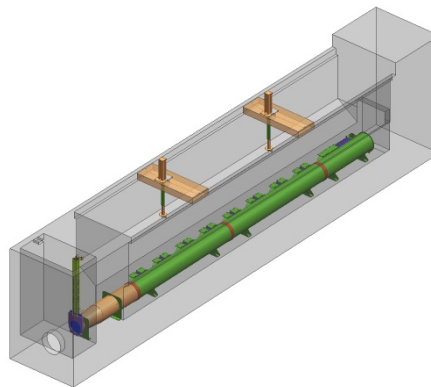

Credibility of Green Labels

No moving parts, no leakages

Complete plant solutions:

- **Engineering**
- Flushing gates
- Sediment tracking
- Stilling racks
- Ancillary equipment
- Flushing tubes
- Dotation
- Entrainments, controls

Low plant costs:

- Substantially reduced excavations
- Geometry easy to build
